FLEXCOM
Agile Provisioning

Simplify and Automate Provisioning Across Platforms

THE CHALLENGES

- Manual MACDs create errors, delays, and rising costs.
- Hybrid migrations lack visibility and control.
- IT resources consumed by repetitive tasks.
- Governance risks in multi-platform environments.

BUSINESS IMPACT

- Reduce up to 80% of operational costs and 95% of management time.
- Free IT teams for strategic projects.
- Ensure compliance with full audit trails and change logs.
- Improve satisfaction with local autonomy and faster issue resolution.

HOW AGILE PROVISIONING HELPS

Automated MACDs: Onboard in seconds, offboard even faster, with standardized templates.

Dial Plan Management: Visual allocation matrix ensures accuracy and control.

Delegation & Self-Care: Role-based delegation gives subsidiaries, departments, or end users autonomy over routine tasks (forwarding, voicemail, devices) while IT retains oversight and compliance.

Flexible Migration: Move by user, site, or department, with real-time hybrid visibility.

Integration Ready: APIs connect with ITSM tools like ServiceNow for workflow consistency.

INDUSTRIES SERVED

- Hospitality
- Finance
- Government
- Education
- Utilities
- Managed Service Providers
- Consulting
- Nonprofits
